## Method

how this dashboard is built

**Source.** Amazon.com, Inc. Forms 10-K, FY2021 through FY2025, plus the accompanying XBRL financial data. All monetary figures are USD; the dashboard presents them in billions.

**Transform.** Every ratio, margin, share and growth figure is computed at render time from the filed line items. No derived number is hard-coded, so changing a source line updates every panel.

**Verify.** Sixty-eight workbook discrepancies were found and corrected against the filings; the full log is above. Segment and revenue-mix totals tie to consolidated net sales in all five years.

**Limits.** Amazon discloses revenue by segment and by stream, not by country. The footprint pages therefore show presence and tier, never implied country revenue.

**Targets.** The scorecard benchmarks are analyst-defined for this portfolio. Amazon does not issue guidance of this kind.
